

About Me

Hello, my name is Bovorn Dejsuwannachai, but you can call me Choon. I'm a Frontend Developer with experience in creating responsive websites that work well on all devices. I also have basic knowledge of backend and SQL, which helps me understand how the whole system works.

Currently, I'm looking for a new challenge and always ready to improve myself. I enjoy learning new things and want to grow together with the company. If you're looking for someone who is motivated and ready to work hard, feel free to contact me!

Skill

Technical Skill

- HTML / CSS
- Javascript
- Dart
- Typescript

Frameworks & Libraries

- Vue.js
- Nuxt.js
- Vuetify
- Flutter
- React
- Next

Personal Skill

- Communication
- Teamwork
- Determination
- Self-improvement mindset

Technologies and Tools

- Visual Studio Code
- Github Desktop
- Docker Desktop
- Postman
- SQLyog
- Figma
- Canva

Educations

Bachelor's Degree : Bachelor of Science (B.S.)

Kasetsart University Kamphaengsaen Campus (2021 - 2024)

- Faculty Of Liberal Arts and Science (GPAX 3.59)

High School

Horwang School (2018 - 2021)

| Academic Projects

MOBILE PROJECT (SOS ALERTITY)

Frontend Developer – Mobile Develop Project
2566

The Emergency Alert (SOS) application provides emergency contact information and audible alarm signals. It also features GPS functionality to locate nearby police stations and hospitals, along with guides for managing emergencies such as drowning and first aid instructions, delivering effective assistance to users.

THE ONLINE PET GROOMING AND HOTEL BOOKING

Frontend Developer – SA Project
2566

This online pet grooming and hotel booking system was developed to facilitate users in scheduling grooming appointments or booking stays for their pets. Users can view announcements and promotions, check booking status, cancel reservations, and access their usage history. Additionally, the system securely stores user and pet information to ensure efficient service management and privacy.

October 2024 – December 2024

ProofEng Soultion

Frontend Developer – Faculty Of Liberal Arts and Science

This system is designed for English grammar checking, allowing users to upload files for price estimation and correction services based on service type and word count. Primary communication with users is conducted via email, and an admin panel is provided for managing all platform operations.

Responsibilities

- Developed websites for users and administrators to ensure smooth operation and efficient management.
- Implemented responsive design to provide optimal user experience across all devices.

July 2024 – October 2024

LASDB

Frontend Developer – Faculty Of Liberal Arts and Science

This website is a comprehensive academic management platform covering books, articles, journals, projects, patents, research grants, and awards. It features an admin panel for management and a dashboard for effective data analysis and monitoring.

Responsibilities

- Developed websites for users and administrators to ensure smooth operation and efficient management.
- Implemented responsive design to provide optimal user experience across all devices.

April 2024 – June 2024

Internship

Developer Trainee – INTERNET THAILAND PUBLIC COMPANY LIMITED

I completed a 2-month internship as a Full Stack Developer at iRecruit, gaining experience in frontend, backend, and database design. I also developed skills in problem-solving, teamwork, and time management in a real work environment.

August 2023 – May 2024

Public Relations

Infographic Designer – Faculty Of Liberal Arts and Science

Main responsibility was designing the TCAS 67 infographic for the Faculty of Liberal Arts and Science, focusing on clear composition and eye-catching color selection. Through this project, I developed skills in design, teamwork, and communication.
